

HEALTHAPP AUTOMATION

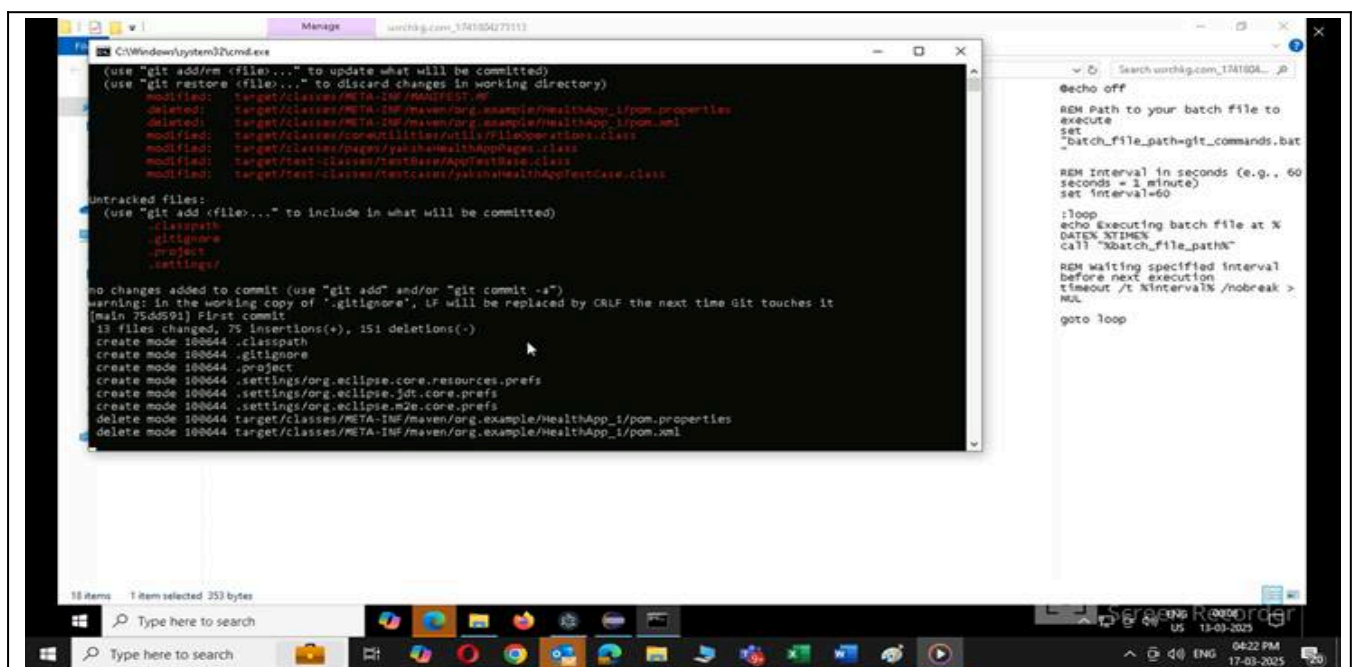

OPERATION THEATRE – PL2

Pre-requisite:

Before you start working on your project, execute the runner file present in your project folder (Simply by double click). **This is mandatory.**

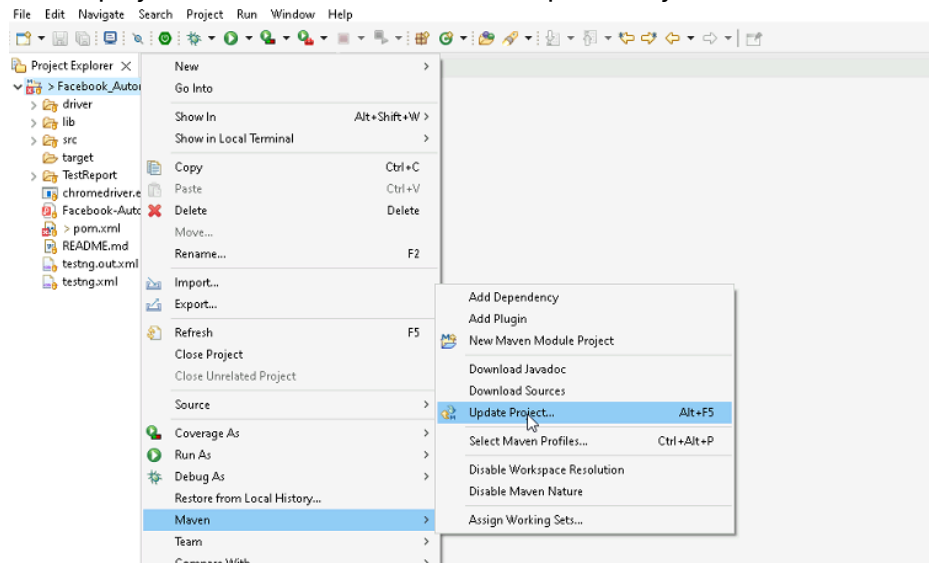

This will launch a command terminal for you where it will keep on pushing your updated code to GIT at regular intervals. Keep that command terminal open at the backend and you can continue working on your project.

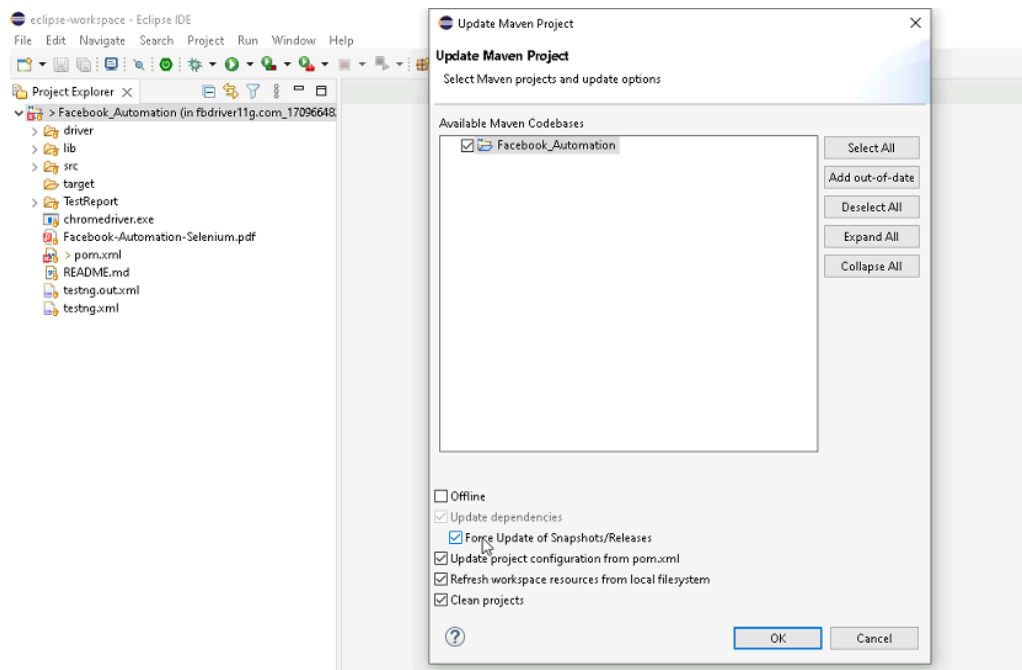

As soon as you import the project in Eclipse, update the project using the maven update option as below. This is to resolve the issue if any Maven dependency not downloaded properly:

1. Right-click on project : Go to “Maven” and select “Update Project”

2. In the Update Maven Project Box Select “Force Update of Snapshots/Releases” and click OK

Template Code Structure:

- a. Below are the packages and files you will be required to work upon.
- b. Other Files and packages you can ignore.
- c. In other Files and packages do not do any changes. It would affect your evaluation.
- d. You are not required to work in "Test" Folder. Files there are non-editable. Editing those files and trying to save them will throw error and would affect your evaluation.

Package	Class/File	Description
src/main/java/coreUtilities/utis/	FileOperations.java	<ol style="list-style-type: none">1. It contains methods to read data from Excel files.2. The method is in templated form.3. You will be required to implement these methods as the very first activity, because even the URL to navigate to, is read using these methods.
/src/main/java/pages	operationTheatre_Pages.java	<ol style="list-style-type: none">1. All core activities (mentioned in the list "Key activities to Implement" below) are to be performed here.2. The comments associated with each templated method here describe the expectation.3. You can define locators and xpath here.4. Declare any variable/object you need to share data/status between different methods.5. Do not modify the signature of methods declared here.6. You can create additional supportive common methods in CommonEvents class.
/src/main/resources/	Config.xlsx	URL to navigate to are already defined here

/src/test/java/testdata/	expected_data.xlsx	Contains data to fill in the form
/src/main/java/coreUtilities/utls	CommonEvents.java	<ol style="list-style-type: none"> 1. Contains all common activities. 2. Certain templated common methods are declared here. 3. You implement them as per your needs. 4. You can add any additional method for common activity here
	Testng.xml	Execution needs to kick-started from TestNG.xml

PROBLEM STATEMENT

Need to automate the following activities using Selenium + Java.

Key Activities to implement:

Sl No.	Summary	Action	Expected Result
1	Ensure the Title & URL of the home page.	<ol style="list-style-type: none"> 1. go to the URL: https://healthapp.yaksha.com/ 2. login as a valid credential (username: admin, password: pass123) and click on the "SignIn" Button 	The title should be : DanpheHealth Url should be : https://healthapp.yaksha.com/Home/Index#/
2	Confirm the presence of the OperationTheatre module.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Click the OperationTheatre module. 	Verify that by Clicking the module, the user should be redirected to the appropriate page and The "Hospital Number" header is visible in the designated table on the OperationTheatre page.
3	Ensure that the "New OT Booking" button is present on the OperationTheatre page and that clicking it opens the "Booking OT Schedule New Patient" form.	Preconditions: The user must be logged in and should be on the "Operation Theatre" Module. Steps: <ol style="list-style-type: none"> 1. Click the "New OT Booking" button. 	Verify the title of the popup form opened by clicking the button. It should be "Booking OT Schedule New Patient".
4	Ensure the presence of necessary textboxes on the "Booking OT Schedule New Patient" form and confirm the accuracy of data entry.	Preconditions: The user must be logged into the system and have navigated to the "Booking OT Schedule New Patient" form. Steps: (use Expected_Data.xlsx to fetch and fill the details in the form) <ol style="list-style-type: none"> 1. Fetch and enter data into the "Select Patient" 2. Fetch and enter data into the "Diagnosis" textbox. 3. Fetch and enter the "Type of Surgery" into the corresponding textbox. 	Verify that the value entered into the "Select Patient" is filled properly.

5	Ensure the Placeholder value of the "Remarks" textbox is "Remarks".	<p>Preconditions: The user must be logged into the system and present on the "Booking OT Schedule New Patient" form.</p> <p>Steps : (No explicit steps here)</p>	<p>Verify the Placeholder value of the "Remarks" textbox should be as "Remarks".</p> <p>Hint: Placeholder value is the greyed text displayed inside the textbox, which disappears when the user clicks and starts inputting the value.</p>
6	Ensure that entering "Dr. Pooja Mishra" in the surgeon name field triggers the appearance of the corresponding button on the form just below the "Surgeon Name" text field.	<p>Preconditions: The user must be logged into the system and on the "Booking OT Schedule New Patient" form.</p> <p>Steps:(use Expected_Data.xlsx to fetch and fill the details in the form)</p> <ol style="list-style-type: none"> 1. Fetch and enter "Dr. Pooja Mishra" into the surgeon name text field. 2. Click outside the textbox. 	Verify that after typing "Dr. Pooja Mishra" and navigating outside the text field, a button with "Dr. Pooja Mishra" should dynamically appear below the surgeon text field.
7	Ensure that upon clicking, the "External?" checkbox, a button with "+" symbol appears next to the checkbox.	<p>Preconditions: The user must be logged into the system and positioned on the "Booking OT Schedule New Patient" form.</p> <p>Steps:</p> <ol style="list-style-type: none"> 1. Click on the "External?" checkbox to change its state to selected. 	Verify that upon clicking, the "External?" checkbox, a button with "+" symbol should dynamically appear next to the "External?" checkbox,
8	Ensure that attempting to submit the "Add External Referral" form without entering the required information triggers an appropriate error message.	<p>Preconditions: The user must be logged into the system and on the "Booking OT Schedule New Patient" form. As well as The "External?" checkbox must be selected.</p> <p>Steps:</p> <ol style="list-style-type: none"> 1. Click on the "+" icon to open the "Add External Referral" form. 2. Click on the "Add" button on the "Add External Referral" form without entering any information. 	Verify The error message should be: Refferer Name is required.
9	Ensure the success message should be "Success update".	<p>Preconditions: The user must be on the "Add External Referral" form.</p> <p>Steps:</p> <ol style="list-style-type: none"> 1. fill in all the details (get data from Excel) 2. Select all the checkboxes. 3. click on the "Add" button 	Verify the success message should be "Success update".
10	Close the "Booking OT Schedule New Patient" form using Javascript.	<p>Preconditions: The user must be on the "Booking OT Schedule New Patient" form.</p> <p>Steps:</p> <ol style="list-style-type: none"> 1. Click on the cross / "X" button using javascript 	The "Booking OT Schedule New Patient" form should be closed.
11	Ensure that the Remarks" text field and "HandOver To User" button are present.	<p>Preconditions: The user must be logged in.</p> <p>Steps:</p> <ol style="list-style-type: none"> 1. Click on the "Billing" Modules 2. Click the "Handover" submodule. 3. Scroll to the button on the page(if required) 4. Enter the value in the "Remarks" text field. 5. Click the "Handover To User" button. 	Verify that the Remarks" text field and "HandOver To User" button are present.
12	verifies the locator value of the remarks text field in the billing sub-module	<p>Preconditions: The user must be logged in and should be on the handover page of the billing module.</p> <p>Steps:</p> <ol style="list-style-type: none"> 1. Click on the "Remarks" text field. 	Verify the locator value of the "Remarks" text field. It should be "HandoverRemarks_User".

13	Expand the Vaccination Modules and validate the "Vaccination Patient Register" form name.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Click the "Vaccination Module". 2. Press "Alt + N" from the keyboard. 	Validate the form name, it should be as "Vaccination Patient Register".
14	Ensure the presence of radio button and dropdown menu.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Click on the expand icon of the "Appointment" module. 2. click on the "Book Appointment" sub-module 3. Click the "+New Patient" button. 4. Click the "Month" radio button. 5. Click the "Days" radio button 6. Select the "Follow-up Patient" from the "Select Visit type" dropdown. 	Verify that the month radio button is selected. Verify that the "Follow-up Patient" option is selected.
15	Ensure that clicking on the "Add Appointment" button will throw an Error Notification popup.	Preconditions: The user must be logged in and should be on the "Create Appointment"(page opens after clicking the New Patient"button) of "Book Appointment" of the "Appointment" module. Steps: <ol style="list-style-type: none"> 1. Click on the "Add Appointment" button. 	Verify that the error message should be : Failed Failed!! Cannot create an appointment. Check the Details Correctly.
16	This function ensures to search for and selects an OT Assistant from an auto-suggestion dropdown in the Operation Theatre Booking Module and verifies the selection.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Navigate to the "Operation Theatre" module. 2. Click on the "New OT Booking" button. 3. Click on the "Select OT Assistant Name" field and search box. 4. Enter the OT Assistant's name into the search box. 5. Select the assistant from the auto suggestion list. 6. Clicks to confirm the selection. 	Verify that "Pooja Mishra" should be selected in the OT Assistant Name field.
17	Captures a screenshot of the current page in the Operation Theatre Module after closing an active window or form.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Click the close button to exit the module. 2. Captures a screenshot of the current page. 	A screenshot of the Operation Theatre Module should be captured and saved.
18	Ensure the triggered tooltip by hovering over the element, and retrieve the tooltip text for verification.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Navigate to the Appointment Module. 2. Hovers over the element to trigger the tooltip. 	Verify the tooltip. it should be "ALT + N = New Patient".
	On the Operation Theatre module, clicking the "New OT Booking" button will popup "Booking OT Schedule New Patient" form. Try to book a New OT Booking without patient Name should popup the alert message "Patient not Selected! Please Select the patient first!". Handle the alert popup and validate the popup message.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Click on the Operation Theatre module 2. Click on the "New OT booking" button 3. Click on the "Add New OT" Button. 4. Click on the Ok button(Present inside the popup). 	Alert popup should be present. And popup message should be : ("Patient not Selected! Please Select the patient first!".)
20	On the "Procurement" modules, Upload an image on the "Add Invoice Header" page.	Preconditions: The user must be logged in. Steps: <ol style="list-style-type: none"> 1. Click on the Procurement module. 2. Click on the settings sub-module. 3. Click on Invoice headers 4. Click on the Add new invoice headers button 	Verify the image should be Uploaded successfully.

		5. Upload a file in the Choose Logo Image field 6. close the "Add Invoice Header" form.	
21	Expand the Procurement module and click on "Purchase Order" submodule. Then click on "Create Purchase order" button and validate the "Add Purchase Order" page name. On the "Add Purchase Order" page, Scroll to the button of the page then send the value (using javascript) to the "Select Terms & Conditions:" Frame by handling frames.	Preconditions: The user must be logged in and must be present in the Procurement module. Steps: <ol style="list-style-type: none"> 1. Click on the Purchase Sub module of the Procurement module 2. Click on the "Create Purchase Order" button. 3. Scroll to the button of the page if required 4. Send the value (send the value Using javascript) to the "Select Terms & Conditions:" Frame. 	Verify the user should navigate to the "Add Purchase Order" page. And able to send the value to the frame.

NOTE: "Please do not delete any file in the src folder. But you are free to add any other file".

Expectations:

- 1) Learners should write automation scripts using Java and Selenium to automate all the steps in the above question. In other words, the automation script should perform all the mentioned steps.
- 2) Learners should not use any tools to create the xpath. They should develop the xpath/cssselector on their own.

IMPLEMENTATION/FUNCTIONAL REQUIREMENT

1.1 CODE QUALITY/OPTIMIZATIONS

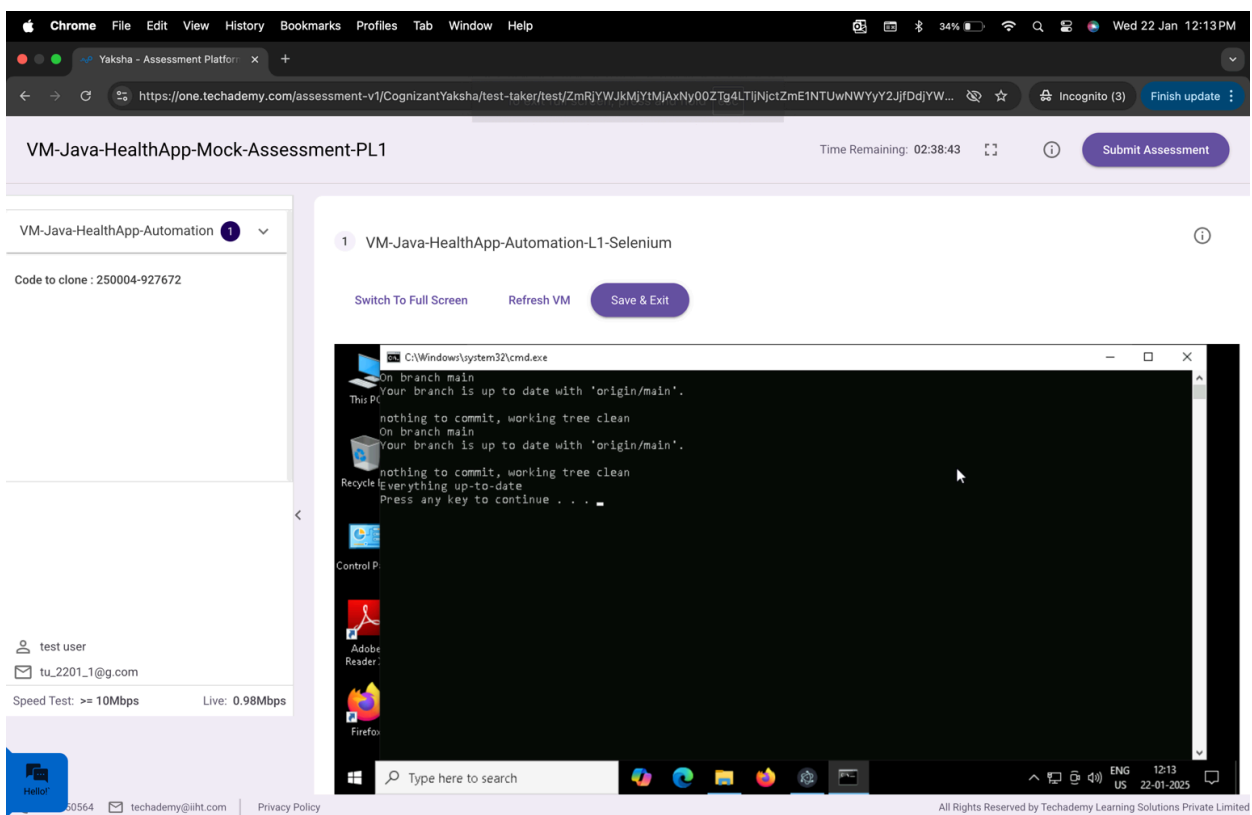

1. Associates should have written clean code that is readable.
2. Associates need to follow SOLID programming principles.

EXECUTION STEPS TO FOLLOW

1. You are mandatory required to run test cases for applications before final submission. Without this project, evaluation will not happen.
2. You can launch test cases any time as follows: Right-click on testng.xml and run TestNGSuite.

3. To do the final submission of the assessment :
 - a. Press escape to come out of Fullscreen mode.
 - b. Submit the assessment.

After the successful submission of the assessment, you will get a confirmation message displayed on your screen.

=====

All the Best
